

Technical Training Series

PowerShift by NV Energy Hosts **FREE** Webinar
Optimizing Lighting Technology Training
Tuesday - October 20, 2020

[Register Now](#)

Greetings!

Did you know that lighting makes up a large portion of electricity consumption and that it is the most frequently retrofitted feature for businesses? As PowerShift energy experts, we know that when businesses implement energy-efficient lighting technology they lower their operating costs. Join us as we shine a spotlight on how new, more efficient lighting technologies and solutions can increase energy savings while reducing operational costs.

You'll hear about how we can help your business save, year after year.

Wes Whited, one of Nevada's energy experts, will discuss:

- Key lighting concepts
- Fundamentals of lighting design for business spaces
- Efficient lighting and how it helps save energy and lower expenses
- Advantages and savings potential of LED technology
- PowerShift incentives available for your business

This webinar is ideal for NV Energy customers, contractors, equipment suppliers, engineers, maintenance professionals and facility managers.
