

I am excited to share the news of the recently agreed relationship between Optimally and National Cost Recovery Services. Evaluating operating expenses and negotiating vendor rates is an arduous proposition for non-Fortune 500 firms or any firm without sophisticated procurement resources.

Through machine learning and proprietary software algorithms, The Optimally technology analyzes your expenses and uses benchmarked spend data, from a \$6 trillion data lake, to ensure you are paying only what you should and not a dollar more.

The best part is that we work on a contingency basis, meaning that if we don't save you money, you don't owe a cent. On top of that, none of this involves changing your current vendor relationships if you don't want to and Optimally even handles all of the vendor negotiations to implement the savings discovered as well as provides continued monitoring to ensure you continue to get the lowest rates possible across 60 to 90 expense categories at no charge.

Thousands of small to medium sized companies have been negatively impacted by COVID-19. This technology is designed to benefit all small to medium sized firms with revenue in excess of \$500,000.

The initial analysis is risk-free, quick, and the savings can potentially be as much as 25%. If this is something that you would like to learn more about, or believe could be of value for your business, reach out to schedule an appointment. <https://bit.ly/39qsey1>
